TEAMCARD

The team card is an **instrument** to help teams with **reflection** and **development**. Working with your **team**, you define important criteria for **cooperation**, evaluate them regularly and jointly assess the results. Whether as a questionnaire, a spider web chart or colored dots on a flip chart, the team card you create can be tailored to your own needs.

How do you generate mood maps of your **COLLABORATION CULTURE**?

:RESOUL seeds #17

TOGETHER

Good collaboration plays out on a variety of levels. Because the perception of collaboration is predominantly subjective, there is an opportunity for the community to address its own culture of collaboration in order to establish a common goal.

These **criteria** might be helpful:
- ✓ Working with our **clients**
- ✓ Internal **structures** and **processes**
- ✓ **We** as a team
- ✓ **How do I feel** in our organization

This way, you can independently check and **control** your collaboration development as a team.
